

Invitation to Bid
WATER TREATMENT

Responses to an Invitation to Bid will be received by the Purchasing Supervisor, Sumner County Board of Education, 1500 Airport Road, Gallatin, TN 37066 for WATER TREATMENT until 9:00 a.m. CDT Tuesday, May 20, 2014. Bid responses will be opened at that time, taken under advisement and evaluated. Should you have any questions please call Chris Harrison, Purchasing Department at (615) 451-5255. All proposals are subject to the Board of Education's conditions and specifications which are available from Vicky Currey, Purchasing Supervisor (615) 451-6560. All bids can be viewed on line at www.sumnerschools.org.

NOTICE TO RESPONDENTS

Responses to an Invitation to Bid will be received by the Purchasing Supervisor in the SUPPORT SERVICE FACILITY CONFERENCE ROOM, Sumner County Board of Education, 1500 Airport Road Gallatin, TN 37066. They will be received until **9:00 A.M. Local Time TUESDAY, MAY 20, 2014** for **WATER TREATMENT**, at which time the responses will be opened, taken under advisement and evaluated. ***BIDS WILL BE POSTED ON www.sumnerschools.org***

GENERAL REQUIREMENTS AND CONDITIONS

1. The Sumner County Board of Education reserves the right to accept or reject any and/or all responses in whole or in part, and to waive informalities therein.
2. Any responses received after the scheduled closing time for the receipt for responses will not be considered.
3. If a mistake is discovered after the responses are received, only the Sumner County Board of Education may allow the respondent to withdraw the entire response.
4. Partial payments will not be approved unless justification for such payment can be shown. Terms will be net 30 days.
5. Payment will not be made until the said **WATER TREATMENT** are inspected and approved as meeting all specifications by persons appointed by the Sumner County Board of Education.
6. Responses submitted must be in a sealed envelope and marked on the outside as follows:
RESPONSE: WATER TREATMENT
DEADLINE: 9:00 A.M., TUESDAY, MAY 20, 2014
7. Facsimile responses will not be considered.
8. If a successful bidder violates any terms of their bid, the contract, school board policy or any law they may be disqualified from bidding for a period of two years for minor violations or longer for major violations. Bids from disqualified bidders will not be accepted during the period of disqualification.
9. Prices quoted on the response (if any) are to be considered firm and binding until the said **WATER TREATMENT** are in the possession of the Sumner County Board of Education.
10. No purchase or contract is authorized or valid until the issuance of a Board Purchase Order in accordance with Board Policy. No Board Employee is authorized to purchase equipment, supplies or services prior to the issuance of such a Purchase Order.
11. Any deviation from these stated terms, specifications and conditions must be coordinated with and approved in writing by the Purchasing Supervisor, Vicky Currey (615) 451-6560.
12. All bids that exceed \$25,000 must have the Company Name, License Number, Expiration Date thereof and License Classification of Contractor listed on outside of sealed envelope. As required by State of Tennessee Code Annotated 62-6-119.
13. The awarded bidder will be required to post a performance and payment bond in the amount of 25% of the contract price if it exceeds \$100,000 as stated by State of Tennessee Code Annotated 12-4-201.
14. If the project cost in excess of \$25,000 a performance bond must be secured by the requesting party in an amount equal to the market improvement value.

WATER TREATMENT

The Sumner County Board of Education, herein known as “School System”, is soliciting bids to treat and maintain the water in cooling and heating units in the school system. There are two kinds of systems to be treated: Cooling Towers and Closed Loops (including geothermal systems). All chemicals must meet applicable EPA and OSHA guidelines. At present, there are forty-one (41) systems to be serviced.

Listed below are the specifications for the “total coverage” water treatment program.

Cooling Tower Control

A solid chemical treatment program for all tower systems shall provide corrosion, scale/deposit, and microbiological control.

Scale and Corrosion Control

Provide solid chemical treatment that includes phosphonates for scale and corrosion control, dispersants and crystal modifiers for scale and deposit control, and tolyltriazole for copper corrosion control.

All cooling towers will be modified in order to utilize solid treatment technology. The use of the required feeder boards and installation shall be included in the contract price. The feeder boards shall remain the property of the water treatment contractor and any maintenance required during the contract period shall also be included. The existing chemical feed pumps should be adequate to administer the solid treatment program. If new pumps are required, they shall be included in the contract price.

The chemical feedrate should supply the following parameters:

Total active phosphonate	2 - 4 ppm
Total active dispersant/crystal modifier	2 - 6 ppm
Tolyltriazole	0.5 - 1 ppm

Microbiological Control

Must meet all EPA and State of Tennessee standards with reference to concentrations in bleed-off water from system in which it is applied and must be labeled to meet all EPA requirements.

Personal safety is of major importance and the biocide program shall be automated on all cooling tower systems.

All cooling towers shall be modified to utilize a solid biocide program. The use of the required

feeder boards, pumps, and installation shall be included in the contract price. The feed equipment shall remain the property of the water treatment contractor and any maintenance required during the contract period shall also be included.

The automated solid biocide program shall use an oxidizing microbiocide to provide biological control.

The water treatment supplier must have the capability of testing for biological contamination and control. The supplier must also have the capability of running *Legionella* tests as required.

Bleedoff Control

Cycles of concentration are to be maintained within a range of 4.0 to 5.0 wherever possible.

Conductivity Control and Chemical Feed Equipment

All existing conductivity controllers and chemical feed pumps to be used unless deemed unrepairable.

The use of the required solid feeder boards for the cooling towers and installation shall be included in the contract price. The feeder boards shall remain the property of the water treatment contractor and any maintenance required during the contract period shall also be included.

The maintenance of all the control and feed equipment (including existing controllers and pumps) shall be included in the contract price. If equipment cannot be repaired, it shall be replaced. All repairs and replacements shall be included in the contract price (including controllers, solid feeders, pumps, and solenoid valves). Installation of the control and feed equipment and any required repairs or modifications to the bypass plumbing for this equipment shall also be included in the contract price.

Repairs or maintenance required on the systems themselves (cooling towers, heat exchangers, etc.) shall be done by School System maintenance personnel. Water treatment company shall notify School System of any required maintenance noticed during the service visits. (ex. Float adjustments, make up valves, pop off valves, etc.)

Closed Loop and Geothermal Water Systems

Corrosion Control

Provide a treatment program that uses nitrite/borate as the primary corrosion inhibitor with tolyltriazole for copper protection.

The sodium nitrite level must be maintained within 800 to 1500 ppm control range, with tolyltriazole present at 5 to 50 ppm. pH should be maintained in the range of 8.0 – 11.0.

Should a loop become contaminated with bacteria, provide biocide dosage until control is maintained.

Record water meter readings on systems equipped with makeup water meters and calculate water usage.

Required Supervisory Services

Service Frequency

Closed loops and geothermal systems will be serviced on a quarterly basis once treated to specifications. Cooling towers will be serviced monthly when in operation.

Services provided during each service call

- Conduct chemical tests on each system (treatment residuals, conductivity, etc.)
 - Maintain treatment inventory, deliver treatment products to point of use, and add to systems as required.
 - Check, calibrate and clean conductivity control and chemical feed equipment as required. Inspect equipment for cleanliness and proper operation.
 - Provide service reports in electronic format listing test results
 - Provide a method to store technical data and service reports in an electronic format for easy and efficient access by Sumner County school personnel.
-
- **Other Services**
 - Training seminars provided on location as often as need arises.
 - Deposit analysis and Total Bacteria counts as required to maintain clean heat exchange equipment.

Qualifications

- Primary business activity is water treatment and must have been in business for a minimum of five years with water treatment as primary business activity and live within 50 miles.
- Must have laboratory facility capable of running typical water and deposit analysis, corrosion coupon studies, and bacteria analysis.
- Must have at least one full time staff member who has a college degree in chemistry or a related technical degree whose primary function is technical support.
- Primary service representative must have at least 1 year experience in field service.
- Must have at least one back-up service representative who meets the same criteria as the primary representative.
- Service representatives must have State of Tennessee Pesticide Certification in Microbial Control.
- Provide resume for primary and back up representative as well as technical support staff with bid response.
- Provide copies of Tennessee Pesticide Certification cards for primary and back up representatives.

Terms

The bid will be valid for one year beginning July 1, 2014 thru June 30, 2015. The School System reserves the right to extend the contract for an additional four (4), 1-year terms. Vendors must notify the School System, no less than 60 days prior to contract expiration and in writing, of any cost increase.

The School System shall be invoiced monthly. Invoices are to be mailed to the following address:

Sumner County Board of Education
1500 Airport Road
Gallatin, TN 37066
